## / Portfolio description

The primary objective of the portfolio is to achieve long term capital appreciation by investing in a diversified portfolio of securities, primarily through indirect investment in underlying collective investment schemes. The investment manager has total flexibility as to the appropriate asset allocation at various stages in the investment cycle. Tactical asset allocation changes will be implemented to take advantage of opportunities offered by changing market conditions. The portfolio has adhered to its policy objective since its inception.

## / Cumulative performance (Net of fees)\*

Growth (Net of fees) of USD100 invested at inception.

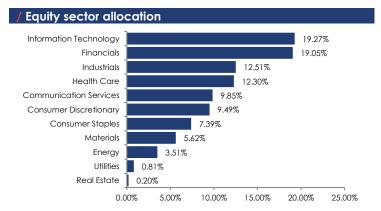

Apr 2019 Jan 2020 Oct 2020 Jul 2021 Apr 2022 Jan 2023 Oct 2023 \*The illustrative investment performance which is shown is for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

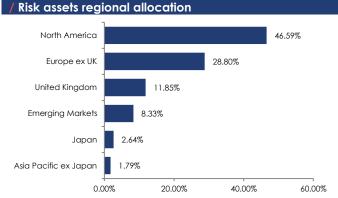

/ Historical performance	Fund	Benchmark	Category
Since inception (cumulative)	26.57%	41.35%	17.75%
Since inception (annualised)	4.90%	7.28%	3.37%
3 Year (annualised)	2.95%	8.81%	1.33%
2 Year (annualised)	3.08%	7.35%	1.56%
1 Year (annualised)	13.78%	6.59%	9.81%

Lowest annual return	-18.26%	3.13%	-15.42%

## **Asset allocation**

Minimum Disclosure Document Issued on 22 April 2024

#### / Relative performance

Over the guarter, the Fund achieved a total return of 2.59% compared to 2.57% of the benchmark. The EAA Fund USD Flexible Allocation, which is the Fund's category, generated a return 1.45%. This performance was generated across the board as the underlying asset classes' market values increased, besides property. The contribution to return of the Fund's property exposure was -0.70%. The equity portion, as the largest asset class allocation in the Fund, contributed the majority of the performance over the period, contributing 3.07% to total return. This is equivalent to an equity exposure holding period return of 5.31%, although behind the MSCI All-Country World Index total return of 8.20%. Commodity exposure contributed 0.17% as silver, gold and platinum prices recovered over the period as market sentiment improved. Bond exposure, despite a significant underweighting within the Fund, contributed 0.15%. The Fund's cash holdings were positively impacted by the appreciation in most currencies relative to the USD. Cash exposure contribution to return over the quarter was 0.10%.

#### / Fund composition

The Investment Manager slightly decreased risk asset exposure, specifically the Fund's property exposure over the period as market valuations became more stretched. Therefore, the Fund exited exposure to the iShares US Property Yield UCITS ETF. With the rise in bond yields globally, bonds became more attractively priced, and the Investment Manager continues to build on the Fund's longer-duration bond exposure. Current risk asset exposure is in line with the Fund's strategic weighting with an active overweight to equities. As always, the Investment Manager is continuously looking for new opportunities to deploy excess cash holdings.

Asset Allocation	2024/03/31	2023/12/31
Cash	13.75%	15.30%
Property	10.05%	10.93%
Bonds/targeted return	15.78%	13.63%
Commodities	5.33%	5.25%
Equities	55.09%	54.89%
Total	100.00%	100.00%

Minimum Disclosure Document Issued on 22 April 2024

Developing Market risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

<u>Default Risk</u>: The risk that the issuers of fixed income instruments may not be able to meet interest payments nor repay the money they have borrowed. Issuers with a lower credit quality will have a greater risk of default which in turn may result in investment loss.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Global Flexible Fund is a sub-fund of the Prescient Global Funds ICAV, an open-ended umbrella type investment company, with seareagted liability between its sub-funds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Communities (UCITS) Regulation, 2011 as amended (the Regulations). It is managed by Prescient Fund Services (Ireland) Limited at 35 Merion Square East, Dublin 2, D02 KH30, Ireland which is authorised by the Central Bank of Ireland, as a UCITS Management Company. The Prescient Global Funds ICAV full prospectus and the Fund's KIID are available free of charge from the Manager or by visiting <a href="https://www.prescient.ie">www.prescient.ie</a>. The Manager retains full legal responsibility for any third party named portfolio. The Global Flexible Fund is registered and approved under section 65 of CISCA.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no augrantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT. VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase-in period, TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets.

Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Fund Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient Fund Services (Ireland) Limited before 10h00 (Irish time), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time, Prescient Fund Services (Ireland) Limited shall not be obliged to transact at the net asset value price as agreed to. The Funds are priced at 17h00 (New York Time). Prices are published daily and are available on the Prescient website.
